

POWERSTART TESTIMONIALS

“I have been using Powerstart silage inoculant for the past 10 years. Powerstart excels in preserving silage in both wet and dry conditions. Forage is highly palatable and my cows just love it!” **Peter Ging, Ballyclider Herd, Co. Laois.**

“My father and I first used Powerstart in the very wet year of 2002. We do not have a feeder wagon, and so our business hinges on quality forage. In difficult conditions we made fantastic silage, with super intakes. We could not have done this without Powerstart.” **Tom and Hazel Dickson, Cornsly Herd, Moate, Co Westmeath.**

“We have been using Powerstart for the last six years. It is the most reliable product I have ever used, consistently giving me a highly palatable grass silage. With this, cows and heifers perform the way I want them to. From such a small investment I have massive returns.” **Kevin Flynn, Reary herd, Clonaslee, Co Laois.**
