JGRENNAN

Pect O Lyte, is a superior quality Pectin inclusive electrolyte product. For better value, it is available in a 20 dose pack.

Always the Best

Wonderthrive Calf milk replacer:

A Complete, Yogurt Enriched and Instant Mix Calf Milk Replacer.

Contains Fibosel, which is an exposed yeast cell wall that stimulates the immune system. Also contains Calcium Butyrate which stimulates both intake of milk replacer & calf ration leading to extensive development of rumen papillae.

Available with **Lungbooster Plus** as an option. Designed to mix easily, so it is perfectly suited for use in both bucket feeding and automatic feeding systems. Maintain mixing rate right through the milk feeding period, but gradually reduce volumes fed as soon as concentrate intakes reach 1.25kg/hd/day.

- **Twice a day feeding:** Mix 125grams to make 1litre
- **Once a day feeding:** Mix 150grams to make 1litre

Lungbooster Plus is added to **NUGGET** Wonderthrive Milk Replacer, targeted at assisting the calf's immune system against both respiratory and digestive diseases.

Clears the airways and facilitates easier breathing. Results in a healthier gut which gives better absorption of nutrients in the intestines.

Lungbooster is Available in NUGGET Calf Crunch No.2 & Super Weanling Crunch.

Lungbooster is a cost effective solution for respiratory support.

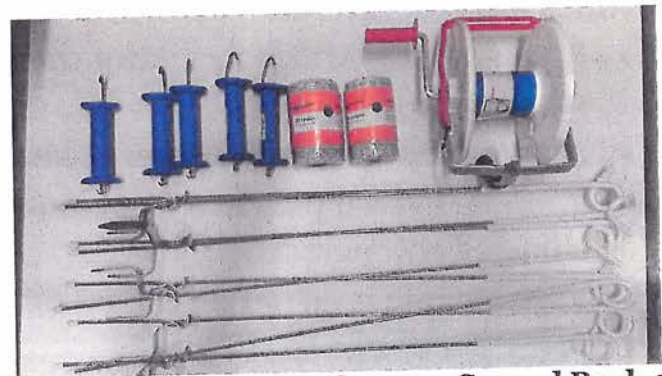

Facilitates breathing & reduces panting.

Stimulates the animal's immune system to respond to infection faster.

Removes harmful pathogens by increasing flow of mucus from the nose.

Nurse weak lambs back to health with the Pyon Lamb Warmer (Only €239)

Fencing deal: 10 x Pigtail Posts, Geared Reel, 2 x 250mtr polywire, 5 x Gate handles for €89 along with 1 x 250mtr of polywire free.

In association with Tom Shaw Farm Machinery, would like to invite you to a fertiliser spreader information day on March 10th at Tom Shaws premises in Dromoyle, Birr. On display will be a full range of Bogballe & Bredal Spreaders. All Welcome.

Bulk Spreading: Reap the Rewards!!

Does it Make Economic Sense for you to Spread Your Own Fertiliser??

Consider the following:

- Value of your own time
- Wear of tractor
- Diesel
- Second machine to load the fertiliser
- Cost of spreader
- Accuracy:
(Who gets it exactly right? How many times has there been too much or too little applied?)
- Is that headland round always an issue?

Fertiliser Bulk Spreading – is the most modern & efficient way to spread fertiliser costing as little as €70/hr from the time of arrival until departure of farm.

Fert delivered and spread with the one machine, eliminating the need for trailers and plastic disposal.

Spreaders have the most up to date Spreading & GPS technology installed which delivers extremely accurate spread patterns right to the field boundary.

- Auto steering- which facilitates the ultimate in accuracy & consistency of spread widths.
- Automatic switching on & off at headlands
- Minimal overlapping in short ground as spinner speeds & application rates are adjusted automatically.
- Variable rate is an option & GPS field mapping available

Brings the Ultimate in Fertiliser to Irish Agriculture from the Newest and Most Efficient Fertiliser Manufacturing Facility in Ireland.

It is the ONLY Brand in Ireland to Install Dust Extraction Technology.

Can produce a Custom Blend Fertiliser based on Soil Sample Results.

It now brings you an Improved Version of the Most Efficient way to Spread Fertiliser
