NEWSLETTER FEBRUARY 2018

IT'S CALVING SEASON!

All the metabolic changes that occur around calving can have serious long-term repercussions for your cow. So, it stands to reason that a good start after calving is essential for keeping cows in good shape and for maintaining the good performance of the herd. View our extensive, high quality range of calving related products in store or online at www.grennans.ie today.

REVIVA

Energy boost drink for recovery after calving

- Reviva is the undisputed market leader in post calving rehydration and nutrient replacement.
- Cows can lose up to 30 Lt of bodily fluid during calving.
- Use 1kg of Reviva per 20 Lt warm water immediately after calving. It rehydrates the cow, it increases blood calcium levels and restores dry matter intake quickly.
- The best energy drink available and the one the cows love to drink!

PECT-O-LYTE

- Pect-o-lyte is our own branded electrolyte & rehydration therapy for scouring calves.
- This 20-dose pack represents tremendous value for money because we invested in the product not in the packaging.
- Pect-o-lyte provides the scouring calf with all necessary nutrients and acts as a vital source of energy for the calf.

DAIRY HYGIENE

Now in stock a full range of BIOCEL dairy hygiene products. Biocel are a leading Irish company who have been in the detergent business for over 50 years. Biocel products are available to suit all different farm situations. E.g. hard water areas, chlorine free and others. Biocel products also offer great value, are high quality and well proven on Irish farms over many years.

Teat dips come in concentrate and RTU form, and are suitable for pre-& post milking.

If you would like to enquire about which Biocel products best suit your farm, please contact any of our retail stores. Biocel themselves provide a great on-farm backup service that can be arranged via our stores.

NOW IN STOCK!

- 76% Sodium Hydroxide Moorepark formulation.
- Suitable for Hot & Cold use, in hard & soft water areas.
- Save €17.00 with Locount Powder Detergent (11kg) in comparison to the common brand.

VETERINARY EQUIPMENT

PYON - Makes your calving / lambing season simple

Gill & Alan Dickson, co-founders of PYON products have been creating innovative solutions for young stock management for 25 years. Extensive research from the US and northern Europe shows that feeding plenty of milk solids in the first 8 weeks of a calf's life 'switches on' genes which protect them against disease, and promotes higher production in later life. This led Pyon to the creation of **Heatwave**. **Heatwave** is a very simple and inexpensive system that heats cold milk. Milk intakes and calf thrive on this system are unbeatable.

If you are calving cows you will need a simple system for managing colostrum. **Pyon's Store & Thaw** System allows you to freeze & thaw colostrum very quickly without harming the valuable antibodies.

Pyon have also developed a system they call **Frisky Lamb Warmer** for warming up hypothermic (cold) lambs. This again is a very simple system which is easily dis-assembled for disinfection, as well as being very durable. For more information, see products below, on our website at www.grennans.ie or call into any of our retail stores.

HEATWAVE

A warm milk feeding system for calves, lambs and goat kids, Feeds milk replacer or whole milk

- Feeds up to 30 calves or 50 lambs
- Suitable for milk powder or whole milk feeding
- Hygienic, milk is stored cold
- Labour saving

STORE & THAW – WATER BATH

Fast, efficient collection & handling of colostrum is the bedrock of a successful calving season. This allows colostrum to be frozen & thawed very efficiently. It can also be used for pasteurisation if required.

- Thaws colostrum quickly (within 15 minutes)
- Avoids damage to the delicate immunoglobulins
- Designed to keep the temperature of the bath accurate, creating a flow of warm water around the bags
- Routine thawing of 2 x 2L at 50°C takes 12 minutes to reach a feeding temperature of 39°C
- Holds a steady water temperature of 60°C for 60 minute

FRISKY LAMB WARMER

The Frisky Lamb Warmer provides a constant flow of warm air to help revive hypothermic lambs.

- Robust plastic body and wire mesh floor for good drainage, easy cleaning and disinfection.
- Fully assembled and ready to use.
- Air flow is directed to circulate around the lamb. Perspex panel slides open to allow moisture to escape, and cool down.
- Suitable for 2 or 3 Lambs
- Suitable for lambs from 2 different ewes with separator mesh.
- Keeps lambs separate and so prevents mis-mothering.
