

4 Way Sheep

20kg Mollassed Mineral & Vitamin Block

For all lambs, hoggets, ewes and rams.

- ▶ Contains **high levels of all essential minerals and vitamins.**
- ▶ Contains **maximum permitted levels of Zinc** to promote harder hooves, healthier feet and reduced lameness.
- ▶ Contains **4 different forms of Zinc** to ensure all types of zinc deficiencies are catered for.
- ▶ Contains **30% Protected Zinc** to ensure maximum uptake.
- ▶ Contains high levels of Cobalt to prevent “Summer Stop” and optimise thrive off grazed grass.
- ▶ Contains high levels of Selenium and Vitamin E.

Recommended feeding rate;

Ewes: (75kg LW) 25-30g per day. | Lambs: (30kg LW) 10-12g per day.

WARNING;

- Contains high levels of Selenium. Care should be exercised in known high Selenium areas.

Analysis

Analytical Constituents	
Calcium	10.1%
Phosphorous	1.0%
Sodium	8.0%
Magnesium	3.0%

Additives - Vitamins per kg	
Vitamin A 3a672a	250,000iu
Vitamin D3 3a671	50,000iu
Vitamin E 3a700 (alpha tocopherol)	1,500mg
Vitamin B1 3a821	250mg
Vitamin B12	1.000mcg
Niacin 3a314	500mg

Composition
Cane Molasses, Calcium Carbonate, Sodium Chloride, Magnesium Oxide, Dicalcium Phosphate.

Trace Elements	
Total Zinc	6,200mg
Zinc (as 3b603 Zinc Oxide)	2,475mg
Zinc (as 3b612 Zinc chelate of protein hydrolysates)	375mg
Zinc (as 3b607 Zinc chelate of glycine hydrate)	2,475mg
Zinc (as 3b605 Zinc Sulphate monohydrate)	875mg
Manganese (as 3b502 Manganous Oxide)	3,000mg
Iodine (as 3b202 Calcium Iodate)	500mg
Cobalt (as 3b304 Cobalt Carbonate)	58mg
Selenium (as 3b802 Sodium Selenite)	27mg

4 Good Reasons to use Nugget 4 Way Sheep Block

1. Delivers high levels of 4 different forms of Zinc to cater for the wide variety of nutrient interactions that can occur in different soils and forages. These interactions often suppress the uptake of vital minerals such as zinc.
2. Such high levels of zinc will help harden your sheep's hooves, improve overall hoof health and reduce the incidence of lameness in your flock.
3. The inclusion of high levels of Cobalt is designed to reduce 'summer stop' in lambs, ie the all too common reduction in lamb thrive in mid-summer due to cobalt deficiency. Just 2.5g per head per day of this bucket will supply the recommended 1mg of Cobalt that will prevent summer stop in most cases.
4. The increased levels of Selenium and Vitamin E are extremely beneficial in terms of disease prevention and avoidance of white muscle disease (Muscular Dystrophy).
