

Super Grow Calf Nuts

- Highly palatable and very nutritious starter and grower feed for calves.
- Ideal follow on to any of our calf crunches but can also be fed from 1 week of age right through to weaning and beyond.
- Will promote rapid rumen development which in turn will stimulate high intakes of concentrates.
- Contains a unique blend of minerals, vitamins and yeast which will supply the calf with all it needs for optimum thrive.

UFL: 0.97 as fed

Early Graze Calf Nuts

- A high energy, highly digestible calf nut designed to maximise live-weight gain for calves that have been turned out to lush pastures.
- Specially formulated to contain low starch and high fibre content to help avoid digestive upsets and complement the growing calf to make the best use of a grass-based diet.
- Contains *Grennan's Super Calf Mineral & Vitamin Package which contains a unique blend of live yeast which further improves digestion and feed efficiency.

UFL: 0.97 as fed

Immuno Calf Nuts

- A high energy, highly digestible calf nut designed to maximise live-weight gain and boost White Blood Cell activity.
- Designed specifically to help ensure optimal health and thrive in young calves.
- Suitable for calves of all ages from 7 days old right through to weaning and beyond.
- Particularly suitable for calves in higher stress situations such as Once-A-Day milk feeding systems, poor housing conditions, bought in calves etc.
- Stressed calves are inclined to have a less active immune system and therefore more open to picking up scours, pneumonia etc.

UFL: 0.97 as fed

WHAT THE FARMERS SAY

EARLY GRAZE CALF NUTS

"We had no issues with scour or bloat, when turning out our calves".

- Austin & Jarlath Ryane

Barnacarroll, Claremorris, Co.Mayo
Participants of the Dairy Beef 500 programme.

Calf Crunch

Keys to Success

CALF CRUNCH

Cooked Calf No 1

- An ideal starter ration for young calves from 7 days up to 2 months old.
- Fully balanced complete feedstuff designed to encourage high intakes & promote early rumen development in young calves.

UFL: 0.97 as fed

Cooked Calf No 2

- Our market leader in calf feeds, designed for calves from 7 days old up to and beyond weaning.
- Highly nutritious and very palatable.

UFL: 0.95 as fed

Cooked Calf No 3

- Formulated for strong calves & weanlings so ideally fed as a follow on to Cooked Calf No.2.
- Ensures excellent growth rates and confirmation in calves & weanlings.
- Ideal for show cattle.

UFL: 0.93 as fed

Keys to a Successful Calf Rearing Season

Calf Rearing Top Tips

- The 5 C's of calf rearing -

Colostrum 3-4 litres within the first 2 hours of birth.

Cleanliness Hygienic birth and housing.

Consistency Feeding according to a schedule, (timing, concentration, temperature, etc.)

Calories Feeding 125-150 grams/litre of Wonder Thrive CMR

Comfort Warm, dry, bright, soft and well ventilated spaces.

J GRENNAN & SONS CALF JACKETS

"With the use of calf jackets you can make significant savings on feed, medication and bedding costs, by better conversion of energy to growth rather than warmth and reduce the risk of pneumonia and scours from chills and draughts. Available in both blue and pink. With every purchase on the pink jacket, €2 is donated to Breast Cancer Ireland in support of a crucial cause".

Wonder Thrive

Calf Milk Replacer

Wonder Thrive

Oil 17% Protein 23%

Wonder Thrive is a quality whey-based Calf Milk Replacer (CMR), which is very palatable to the young calf. It optimizes growth rates in young calves due to the high level of quality proteins and oils. It's fully balanced for vitamins and minerals.

It also contains a probiotic to aid better overall calf gut health. Suited to all feeding systems - Ad- Lib, bucket and automatic feeding systems.

Wonder Thrive can be fed as a Once-A-Day or twice per day CMR.

Wonder Thrive with LungBooster+

Oil 17% Protein 23%

The same nutritionally as Wonder Thrive with the added health package of LungBooster+. Contains Pulmosure to help maintain a healthy respiratory system.

Contains the essential oil EMX for nutritional maintenance of a healthy digestive system. Prevents and reduces the risk of Cryptosporidium and coccidiosis.

Wonder Thrive LungBooster+ contains enhanced Medium Chain Fatty Acids (MCFA) effective against Salmonella, E.Coli & Clostridium.

Wonder Thrive with Gut Guard

Oil 17% Protein 23%

The same again nutritionally as Wonder Thrive with the added health package of Gut Guard.

Gut Guard is a completely natural feed additive which helps protect against infectious scours, therefore helping to protect the gut, reduce pathogen load & improve overall calf thrive.

Wonder Thrive Hi-Skim with Gut Guard

Oil 17% Protein 23%

This is a high-quality milk replacer containing Gut Guard. It's formulated to deliver superior live weight gain and excellent health status in calves. It contains high levels of skim milk powder and whey powder, thereby ensuring it makes a highly digestible, high-performance milk. Suitable for all calves, but particularly suitable for replacement dairy heifer calves &/or Once-A-Day feeding regimes from 4 weeks of age.

Grennans Easi Rear

Oil 17% Protein 23%

Grennans Easi Rear is a quality whey-based powder which also contains skim. Grennans Easi Rear contains coconut and palm oil providing a high level of digestible energy. There is an increased level of vitamins and minerals for improved natural immunity. Also, Grennans Easi Rear contains a probiotic for optimum gut health. Ideal as a Once-A-Day CMR.

WONDER THRIVE

CALF MILK REPLACER

What is Gut Guard?

Gut Guard is a completely natural feed additive that has been found to deliver dramatic health benefits to calves.

What does it do?

- It strengthens the gut wall by tightening the junctions between cell walls, preventing leaky gut.
- Prevents pathogens such as Cryptosporidium, Clostridia, E.coli and Coccidiosis attaching to the gut wall and gaining an infectious foot hold.
- Where and when pathogen bugs do gain an infectious foot hold and cause scour, Gut Guard always reduces the duration and severity of these scours.
- Calves have better feed intakes & more consistent dungs with a better dung score.

What Is LungBooster?

LungBooster is a completely natural feed additive that has been shown to be very effective in helping prevent and reduce the effects of a variety of respiratory and digestive challenges in calves.

What does it do?

- It breaks down the mucous that builds up in the airways of infected animals and promotes its rapid expulsion from the lungs and nasal passage.
- This clears the airways and greatly reduces the potential for further and or prolonged respiratory infections such as pneumonia.
- Our LungBooster+ delivers the additional benefits of also helping prevent some diseases of the gut such as Cryptosporidium Coccidiosis, Salmonella, E.Coli & Clostridium.

WHAT THE FARMERS SAY - "On a busy farm you need trouble - free calves and that's what we get since we started using WonderThrive with Gut Guard." Pdraig & Alan Gilligan of Gilligan Farm Fresh Meats, Four Mile House, Co. Roscommon.

Rath, Birr, Co. Offaly.
